Pricing worksheet

Size price = (width + height in cm) × factor

Time price = hours × hourly rate + materials

- Factor = price of a past sale ÷ (width + height). No sales yet: use the prices of comparable artists.
- Final price: the size price, as long as it is not below the time price, and what you receive after gallery commission still covers your time and materials.
- One final price everywhere: your own site, the studio, fairs and the gallery. The commission comes out of that price.

Work title	Size w × h (cm)	w + h	Factor	Size price	Hours	Hourly rate	Materials	Time price	Final price	Price in gallery	You receive after commission
